 AIR & GAS INDUSTRIES  
19 Industrial Avenue WACOL QLD  
Phone 07 3271 5899

**Instructions**

To install valves  
Push in valve 1.

Additional torque

Push in valve 2.

Valve 2 only to  
be used if pre-set  
torque is insufficient

To remove valves

Use removal tool to

reverse

Push in valve 3.

Drain water trap daily

Check oil level daily

Set oil flow @ 3 dpm

1. Air on, pre-set torque  
(insert valves)

2. Air on, additional torque  
(orientate valves)

3. Air on, reverse direction  
(remove valves)

**LPG 4-45KG**

# CYLINDER DEVALVER WITH AUTO CLAMP

Air & Gas Industries offers the **ACS3100 4-45kg Cylinder Devalver** which offers **ease of use and improved operational efficiencies within cylinder handling operations.**

**Contact us today to find out more!**

## FEATURES

The devalver incorporates a pneumatic torque wrench which has a number of selectable torque settings for efficiently removing valves, inserting valves and orientating valves. The devalving tool is raised and lowered into position with a self-retracting cable winch.

The ACS3100 utilises an automatic cylinder clamp to hold the cylinder in position. A range of cylinder sizes from 4kg – 45kg can be used in this clamp by positioning the adjustable support plate at the correct height.

### Benefits of the ACS3100 Devalver:

- Increased operator efficiency
- Reduces manual handling
- Reduces risk of injury
- Automated Cylinder Clamping
